EXPERIENCE

Farmdrop

London
Ruby on Rails Developer
April 2017 - Present

Primary responsibilities include maintaining Farmdrop's customer-facing Rails RESTful API, developing new features, integrating with third party SaaS products such as Urban AirShip, Iterable, Segment and Xero, as well as developing new features and triaging bugs. Projects have included working as the primary front-end developer on the new front page of the website, as well as focusing on code optimisation and improving the back-end test suite.

Route1

London
Technologist
January - April 2017

Working as a Technologist, specialising in Ruby on Rails, Node.js and React.js development. Technologies include those previously listed, plus Webpack, ES6 nomenclature, Gulp and Grunt task runners as well as Linux system administration.

MB Interactive

St. Albans
C# Developer
June 2013 - Dec. 2016

Responsible for building new features, bug fixing and moving across several projects from ASP.NET WebForms to MVC architecture. Introduced Git, continuous integration, and unit testing to the company, improved overall performance of code by introducing an ORM to main code base, rewrote several applications in C# that were originally in VB.NET and improved overall test-ability of code by re-architecting according to SOLID principles.

EDUCATION

University of Hertfordshire

MSc Computer Science (Distinction)
January 2013 - January 2014

University of Reading

BA English Literature (2nd class honours)
September 2008 - August 2011
