EXPERIENCE

Farmdrop

London
Ruby on Rails Developer
April 2017 - Present

Farmdrop aims to disrupt the online grocery market. Working with Ruby on Rails, React.JS and other modern web technologies.

Route1

London
Technologist
January - April 2017

Route1 is an early stage startup intent on disrupting the legal recruiting market. I am working as a Technologist, specialising in Ruby on Rails, Node.js and React.js development. Technologies include those previously listed, plus Webpack, ES6 nomenclature, Gulp and Grunt task runners as well as Linux system administration.

MB Interactive

St. Albans
C# Developer
June 2013 - Dec. 2016

Responsible for building new features, bug fixing and moving across several projects from ASP.NET WebForms to MVC architecture. Introduced Git, continuous integration, and unit testing to the company, improved overall performance of code by introducing an ORM to main code base, rewrote several applications in C# that were originally in VB.NET and improved overall test-ability of code by re-architecting according to SOLID principles.
